

Environmental Policy

AB Refrigeration Contracting Ltd
Bank Chambers, 2 Church Street, Reigate, Surrey, RH2 0AN

AB Refrigeration Contracting Ltd endeavours to reduce the impact of its activities on the environment, principally of the detrimental effect of the refrigeration and air conditioning systems it designs, installs, operates, services and maintains. In particular this includes maximising the energy efficiency and minimising the refrigerant leakage of these systems.

To achieve our environmental objectives we:

- Ensure engineers and technicians are appropriately trained;
- Have an easily accessible library of up to date and relevant information which is used by all engineers and technicians;
- Equip engineers and technicians with suitable tools;
- Implement procedures, designed to reduce environmental impact, which are followed for design, installation, operation, service and maintenance of refrigeration and air conditioning systems;
- Audit our environmental performance. The full environmental policy is available from AB Refrigeration Contracting Ltd, and includes sections on refrigerants and energy consumption of refrigeration and air conditioning systems.
- Commit to Prevention of Pollution in all activities we undertake.
- When undertaking our processes we will endeavour to protect the Environment where possible
- Comply with all relevant Legal and Other (compliance) requirements and regularly review against these.
- Drive Continual Improvement through challenging all within the company to be more efficient and effective.
